newline
the Award-Winning
Interactive Flat Panel Display

With over 10 years of dedication, **newline** has been devoted to developing collaboration solutions that support the talents connect, create, and collaborate cost-effectively.

Transform the meeting room into a rich,
video-enabled collaboration space with one single device

Create

The intuitive, collaborative workplace

newline Interactive Solutions Help Corporates to Establish Collaborative Methods

Start teamwork with a platform that combines the benefits of conventional whiteboards and displays.

Build an advanced office that integrates your displays into the corporate network.

Connect

Bring people, places, and information together

Combine the Old, Familiar Features with the New, Intuitive Experience

Sketch out ideas, document timelines, and track milestones; access all Windows software just like on a PC; write with a pen and draw with fingers on the display with accurate and responsive touch experiences.

Start meetings :
The only device required to set up meetings and conference calls

Connect participants :
Invite remote team with preferred tools; share screen with own devices

Share content :
Share notes and files instantly during and after the meeting

Collaborate

Boost employee engagement, productivity, and efficiency

Your Business Relies on Collaboration to Thrive

newline interactive solutions help visualize information, exchange data in a brief manner and offer the modern tools built for active communication.

Drive synergy in your business for exponential growth.

Streamline and optimize communication with easy-to-access internet, apps and videos

Synergize business processes through interactive and most widely used technology

Co-annotate across laptops, mobiles, and meeting rooms
