

# newline STAY SAFE!

## BEST PRACTISES

There is no single solution that ensures an interactive display remains free from (COVID) viruses. Follow the best practises below to stay safe while using your Newline interactive display.

### 1. WASH YOUR HANDS

Wash your hands thoroughly and/or use hand sanitizer before using the interactive display.

Hand sanitizer

### 2. WEAR A MASK

Preferably wear a mask while using the interactive display. If not available make sure you cough/sneeze into your elbow.

Newline Mask

### 3. CLEAN YOUR SCREEN

1. Power down your display and let it cool down.
2. Spray the cleaner or warm water onto microfiber or soft cloth. This will remove germs, dirt, and dust build up. Do not spray directly onto the screen.
3. Gently wipe the screen in circular motion until the screen is dry.  
Wax on, wax off!
4. Spray alcohol-based disinfectant on a clean soft cloth.
5. Wax on, wax off again! Make sure the screen completely dries.
6. Don't forget to wash your hands and the used cloth when you're done.

Don't forget to disinfect your stylus!

\* Please note: Newline Screen Cleaner removes germs, dirt and impurities. An alcohol based disinfectant kills germs.

## PROTECT YOUR SCREEN. DON'T USE THESE ITEMS

Ammonia

Coarse cloth or scrubber

Harsh soaps or chemicals

Bleach
