# CREATE

TOUCH AND WRITING

## EXPRESS YOURSELF IN THE DIGITAL WORKSPACE

Touch has become second nature. Touch devices need to understand your intention when you touch and writing needs to feel natural. Flex has been developed with these needs in mind.

Easily tilt Flex into a comfortable angle to start writing. Palm rejection allows you to use the pen in a natural writing position. The Flex active pen works fluently with Windows Ink. Simply annotate over any document using any software and save your notes.

Easily tilt FLEX into a comfortable angle to start writing.

The active pen provides you the natural handwriting experience with high precision and low latency.

High resolution 4K monitor

## LEADING THE NEXT GEN OF DESKTOP COLLABORATION

Capturing your voice in a pleasant way without echo or background noise, seeing you from the right angle in a natural way, and having the opportunity to intuitively express yourself by touch and writing are needed to get there.

Newline has developed an all-new concept that enables you to communicate just as intuitively in the digital workspace.

A product that will revolutionize your working day.

# CONNECT

ALL-IN-ONE COLLABORATION

## PLUG AND PLAY IN ANY WAY

Flex wouldn't be called Flex if its features and functions didn't live up to the name.

Simply plug in your laptop and you instantly upgrade to a world-class touch, writing, and videoconferencing experience. Easily power your device with the powered USB-C connection. No need for a learning curve, just use your existing desktop device. Want to remove all the clutter and cables from your desktop? Plug in an SDM for fully integrated computing power, how Flex is that!

-  Powered USB-C
-  Plug & Play
-  Power supply support
-  Windows Hello Correspondence
