OPS On-Board Computer

SMARTER THAN ANY OTHER DISPLAY

Newline displays comes with an Open Pluggable Specification, or OPS, slot giving you the ability to have a computer integrated into the display, no extra devices needed.

Experience a screen with a full operating system that works simply for more interaction and success. In addition, each display comes with a built-in Android system that is accessible by a simple swipe up from the bottom of the screen.

Simply annotate on images, utilizes a basic whiteboard application and more, without needing to download software to any of your own devices.

POWERED BY INTEL

The integrated OPS computer, powered by Intel processors, brings you all the power of a desktop computer built right into your display.

Newline Interactive is an Affiliate member of the Intel Internet of Things Alliance, a global ecosystem of 400+ companies that provide scalable, interoperable solutions that accelerate deployment of intelligent devices and end-to-end analytics.
