newline **BROADCAST**

WIRELESS **CONTENT SHARING** MADE EASY

Newline Broadcast is a powerful streaming tool to share content from your Newline interactive display to any connected participant anywhere in the world! Perfect for any hybrid situation. Use Broadcast alongside your favourite conferencing software and allow anyone to view the displayed content from their device. No matter whether you're using content from your computer, the displays whiteboard, apps or any annotation. There are no apps to download or updates to manage. Your audience can capture what you're sharing and easily add their own annotations.

Connect with the Cloud

One-Touch Setup

Share any content over any network

Focus and zoom in

Webcam & Mic Integration

Hassle-free Management

INTEGRATES WITH **GOOGLE SLIDES**

As a broadcaster, you can share your captured content to Google Slides. This allows you to create a presentation of the captured content from your Broadcast session. Your presentation will be created and saved in your Google Drive folder. Once Google is linked to your Broadcast account, images will be automatically added to your presentation!

Support for all devices and streaming protocols:
