## SECURE

Receive CAP messages from 3rd party platforms

Realtime emergency notifications

Customizable subjects, descriptions, and backgrounds

Integrates with Singlewire, Centegix and more

Google & Microsoft Single-Sign-On support

Bulk register displays with Zero Touch Enrollment

Choose where to send alerts with Group Management

View history of alerts with Alert Auditing Log

## EMERGENCY NOTIFICATIONS, **SIMPLIFIED.**

Introducing Newline Secure, a new Common Alerting Protocol (CAP) integration software that offers robust security alerting capabilities, enabling organizations to receive and process CAP messages from third-party security platforms seamlessly. Key features include real-time emergency notifications that can instantly appear over any application when an alert is triggered, ensuring immediate awareness. Users can customize alert subjects, descriptions, and backgrounds to suit their needs. Newline Secure also supports Google and Microsoft Single-Sign-On (SSO), and bulk display registration is simplified through zero-touch enrollment using device serial numbers. The Newline Secure console allows for group management, enabling targeted alert delivery to specific buildings. An alert auditing log provides a comprehensive history of alerts sent to Newline Secure endpoints for easy tracking and review. Newline Secure integrates with Singlewire Informacast and Centegix CrisisAlert with more coming soon.
