VERIFY

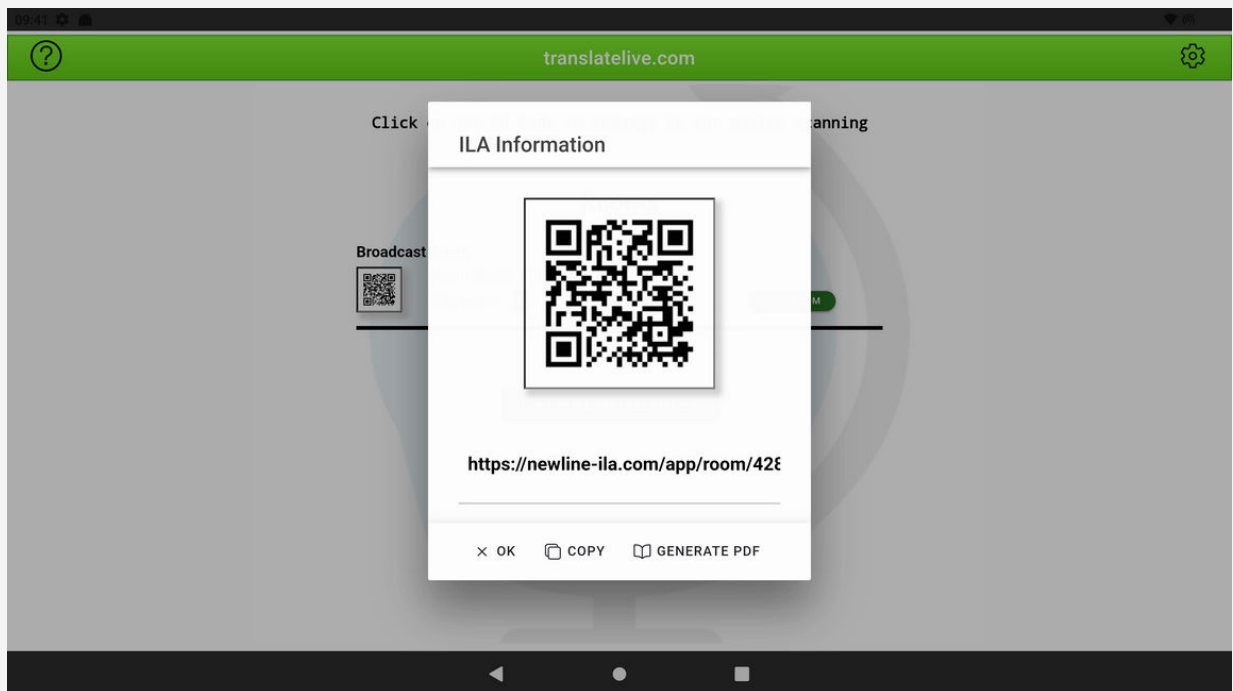

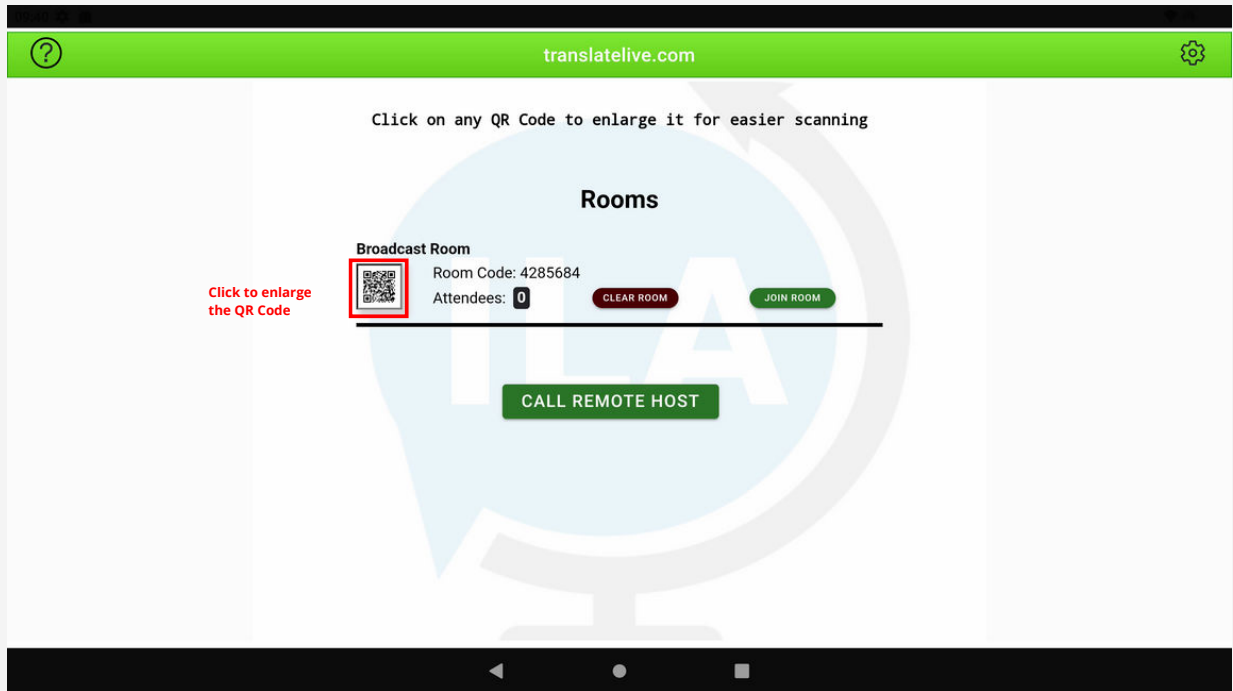

Get Started

Locate your broadcast room code

QR Code

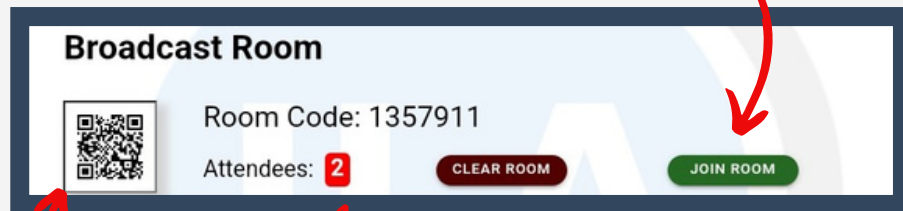

View your QR Code by clicking on the QR Code icon

Once enlarged, you will have the ability to copy your QR Code, link or Generate a PDF

Broadcast Mode

Host an ILA Broadcast room by selecting this button.

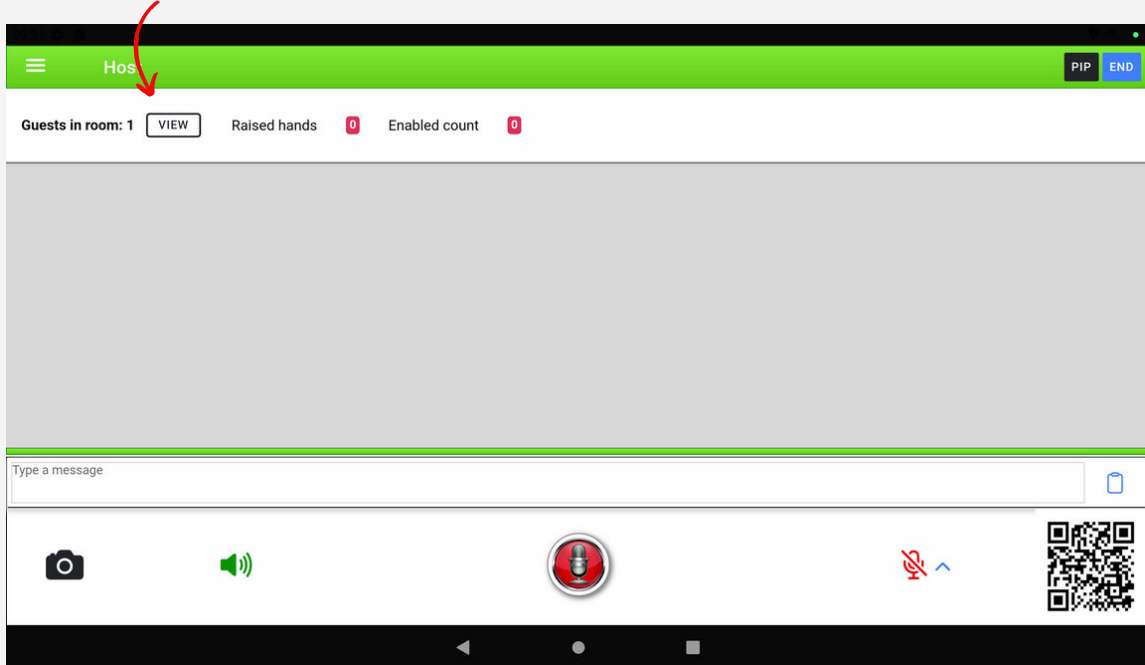

Press on QR code to make it bigger. Students can join by scanning QR code or Going directly to the room link

This icon shows you how many people have joined your Broadcast Room

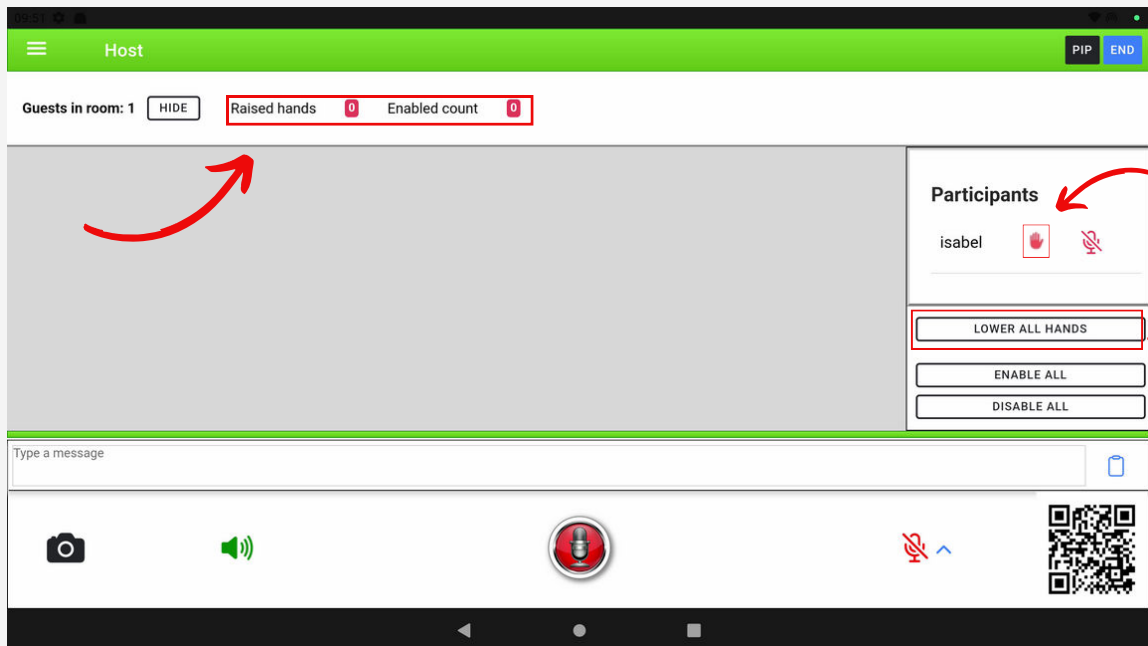

Broadcast Mode

Host

Select this button to view room participant list.

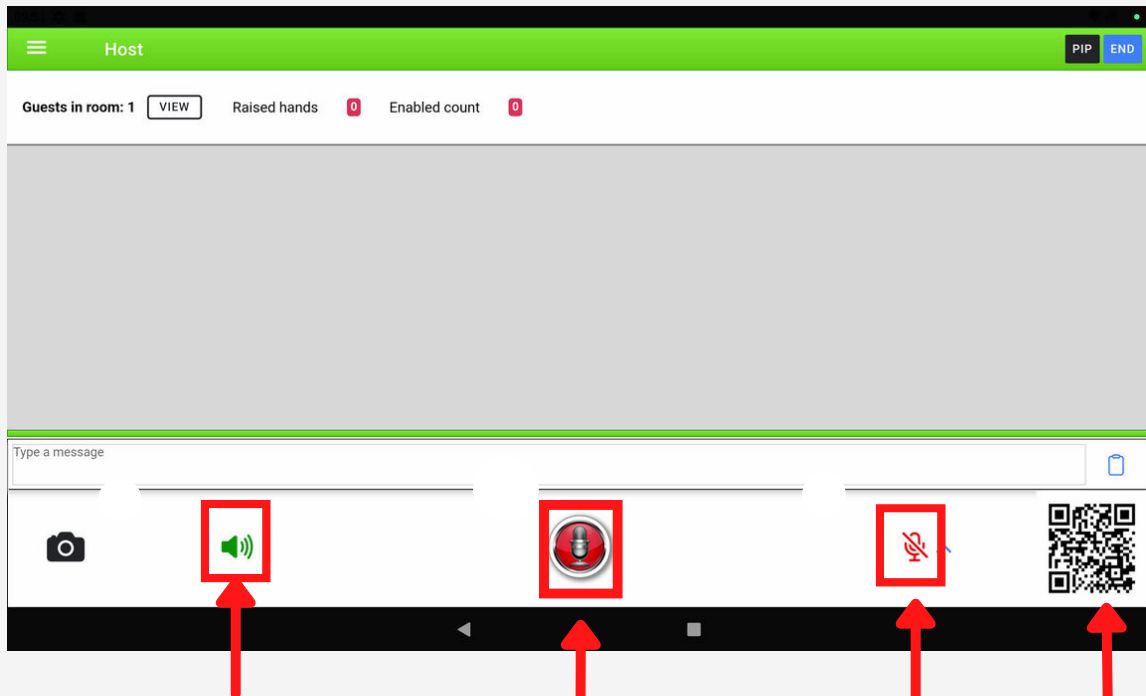

This section shows the number of guests who have requested to speak as well as the number of guests that currently have permission to speak

Approve requests to speak by selecting the raise hand button "Lower all hands" will disapprove all requests to speak. You may also enable or disable all guest mics.

In Room Options

**Broadcast Hosts will have speech to text capabilities at all times.
Guests must request permission to speak.**

Toggle Text to Speech On/Off

Turn "Mute/UnMute" feature
On/Off

Press to Speak. Hold down
Microphone Button while you
speak.

QR Code to be scanned if
others want to join the room.

To activate touch and hold the Mic button or press the small Microphone to activate mute/unmute mode while you speak. The button and background will turn green, letting you know it is actively listening.

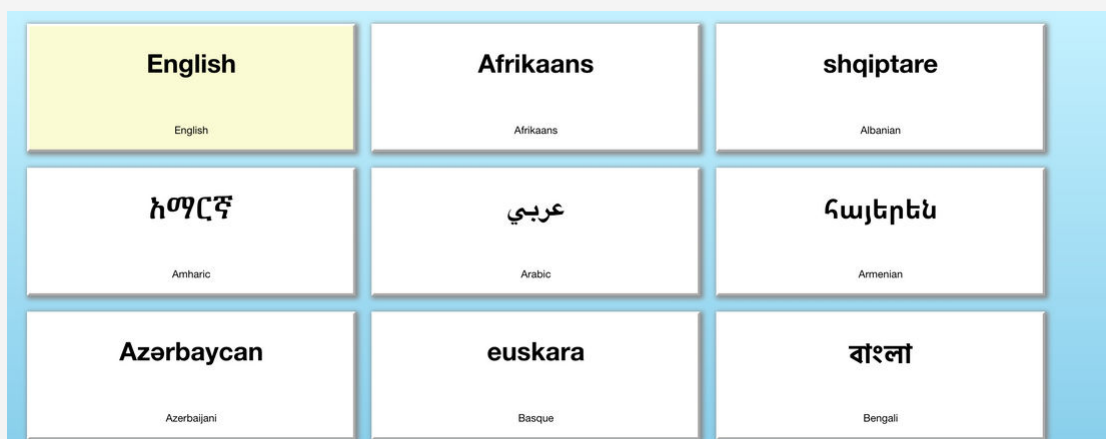

**You may watch the translation in real time to confirm accuracy.
Be sure to speak clearly, slowly, and use full sentences.**

When the session is over, simply select the "End" button located on the top right of the screen.

Broadcast Mode

Guest- Joining Room

Guest will pick Language and Accent

Everything on this screen will be language guest selected

ILA Guest Room Selection Screen

Your Language: English - English

[CHANGE](#)

Room code: 6212213

Enter your name (optional):

Enter your email address (optional):

[\[Red Button\]](#)

Broadcast Mode

Guest- In Session

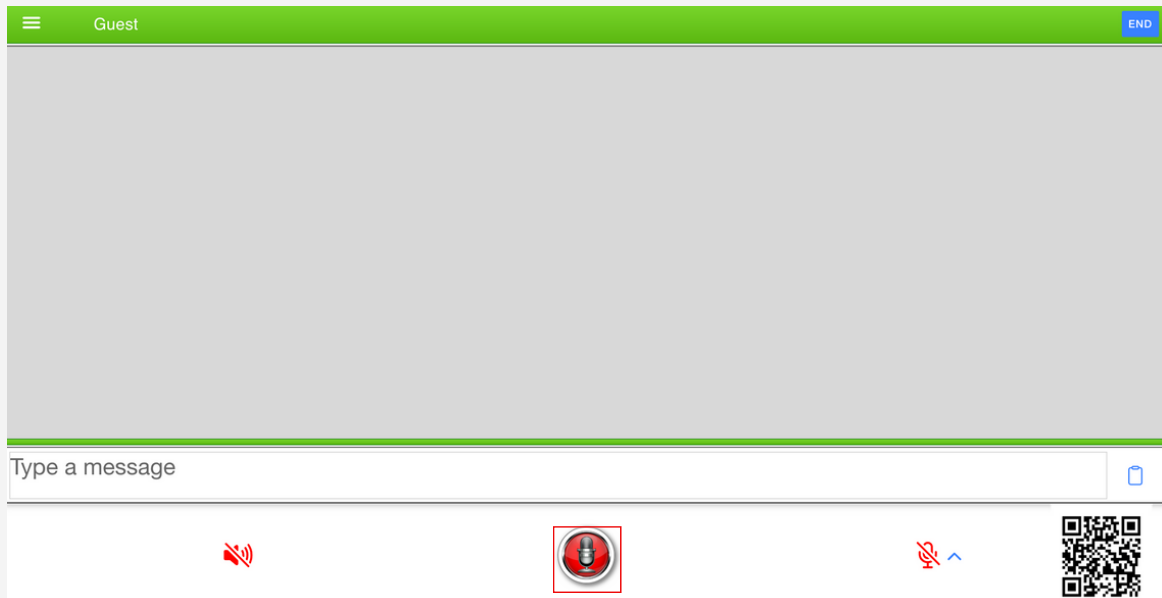

(All Text on this page will be in guests selected language)

Guest can raise hand to request permission to speak.

Guest can turn on Text to Speech so voices out on their preferred language

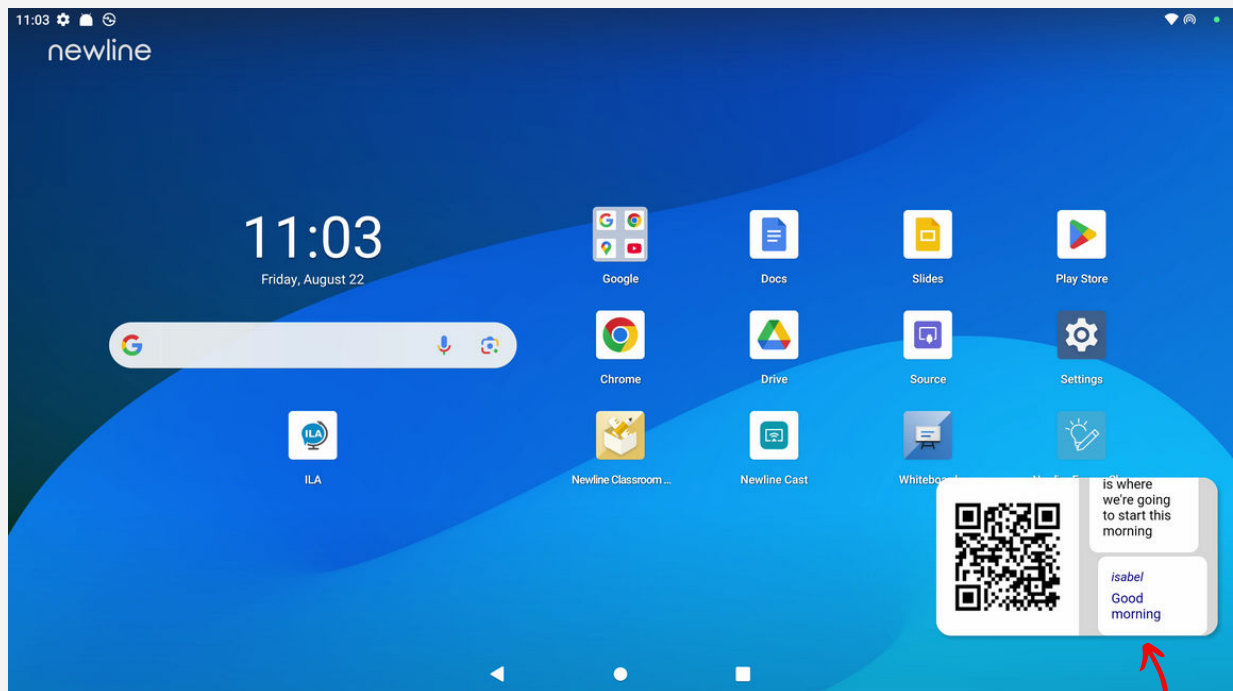

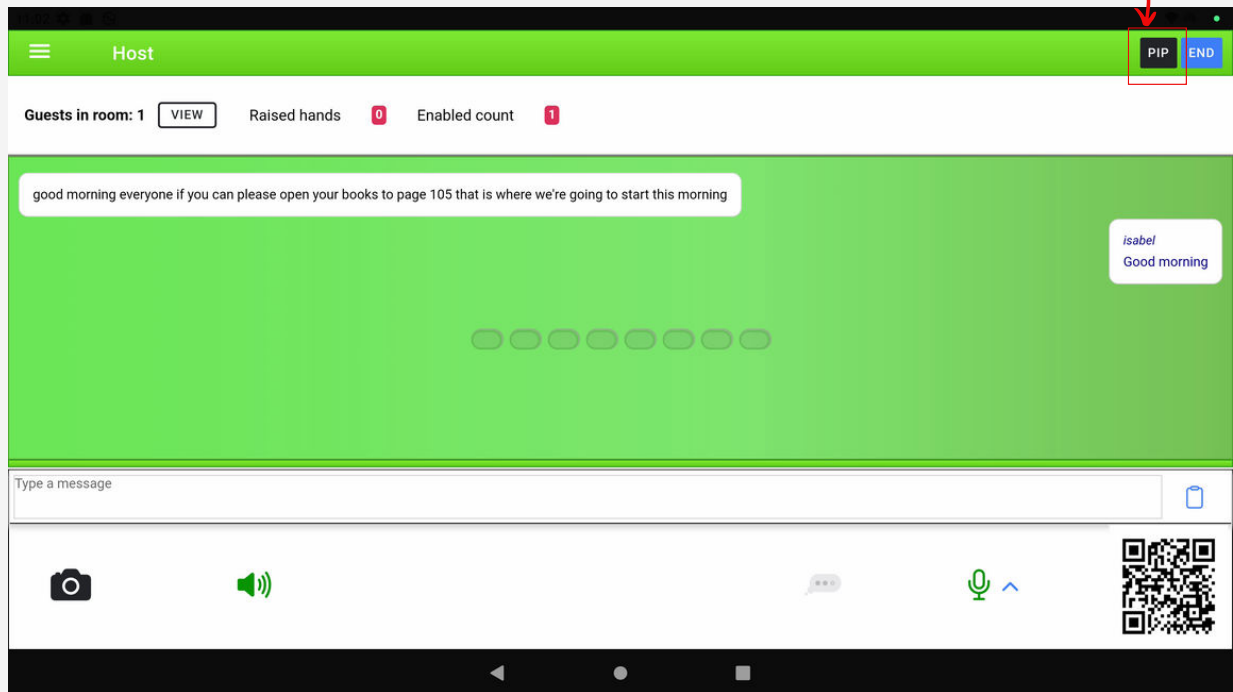

Expand QR Code to share broadcast room.

If host gives permission then guest will see red microphones button to press and speak in their native language and will then show on board as well

PIP mode

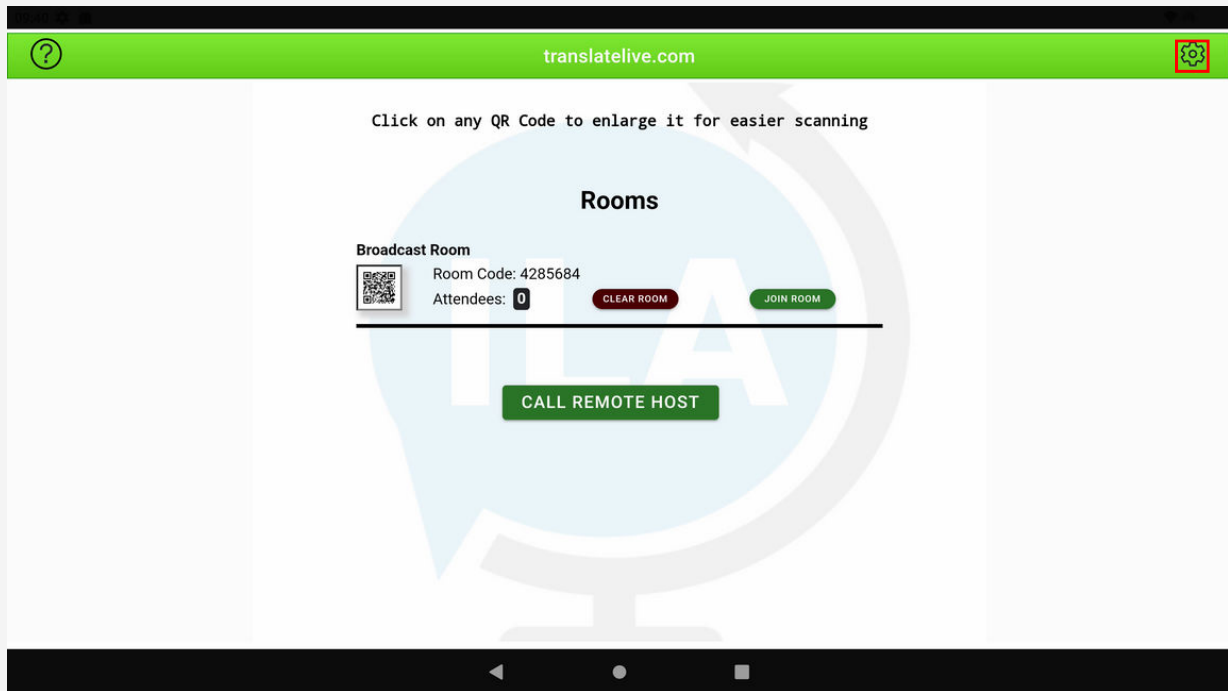

Click here to use Picture in Picture

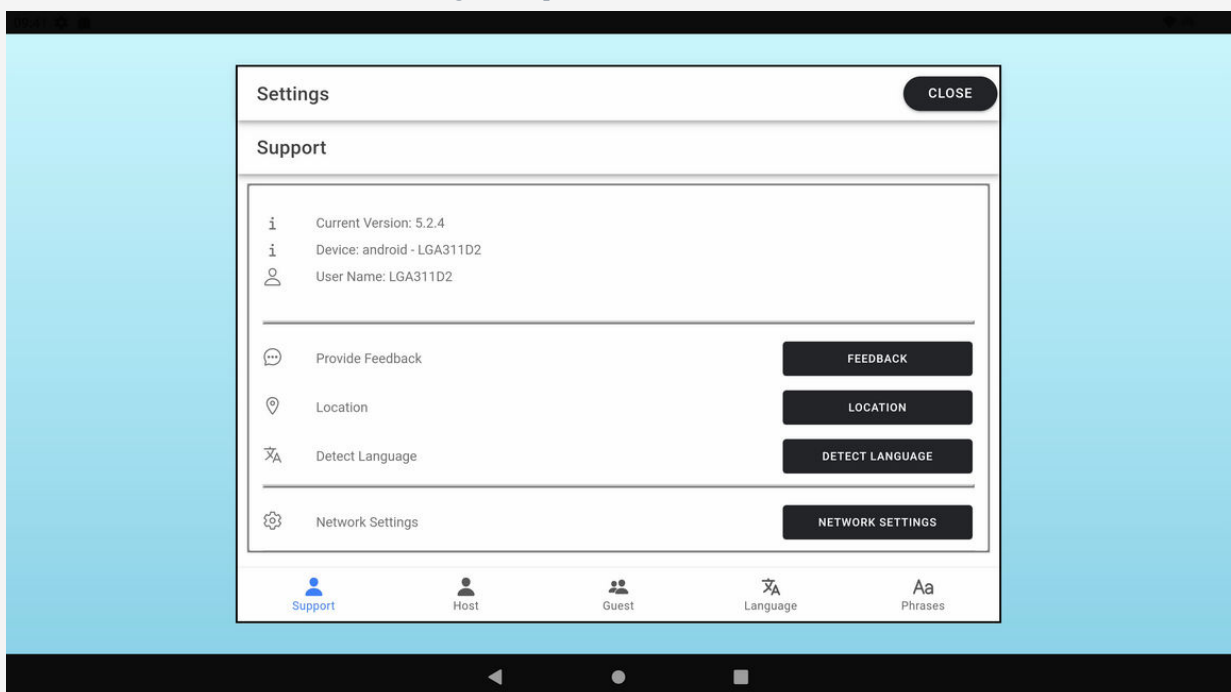

Using PIP shrinks ILA to a small box that shows the QR code to join as well as current STT.

Settings

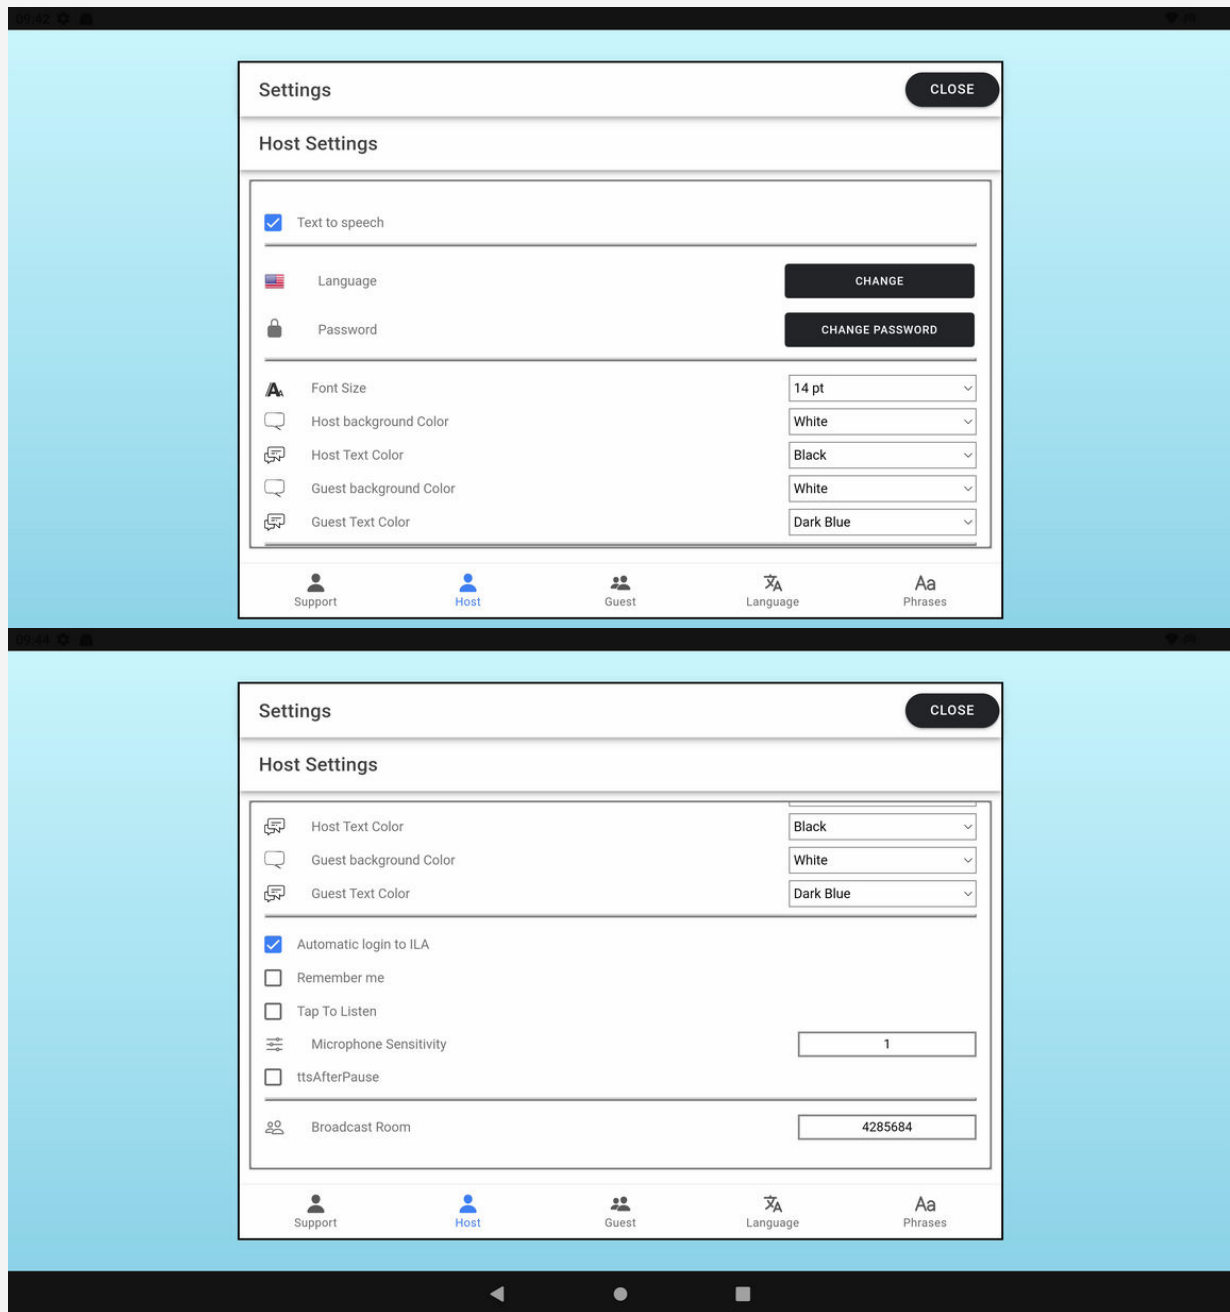

On the top right, open the settings by selecting the gear icon.

Under the support tab, you can find your Version Number, Device Type, and have the ability to provide feedback

Host Menu

Text to speech: ILA will translate text and speak out loud in users chosen language.

Language: Change language for host device.

Password: Change your account password.

Font Size: Adjust font size.

Host Background Color: Adjust background color.

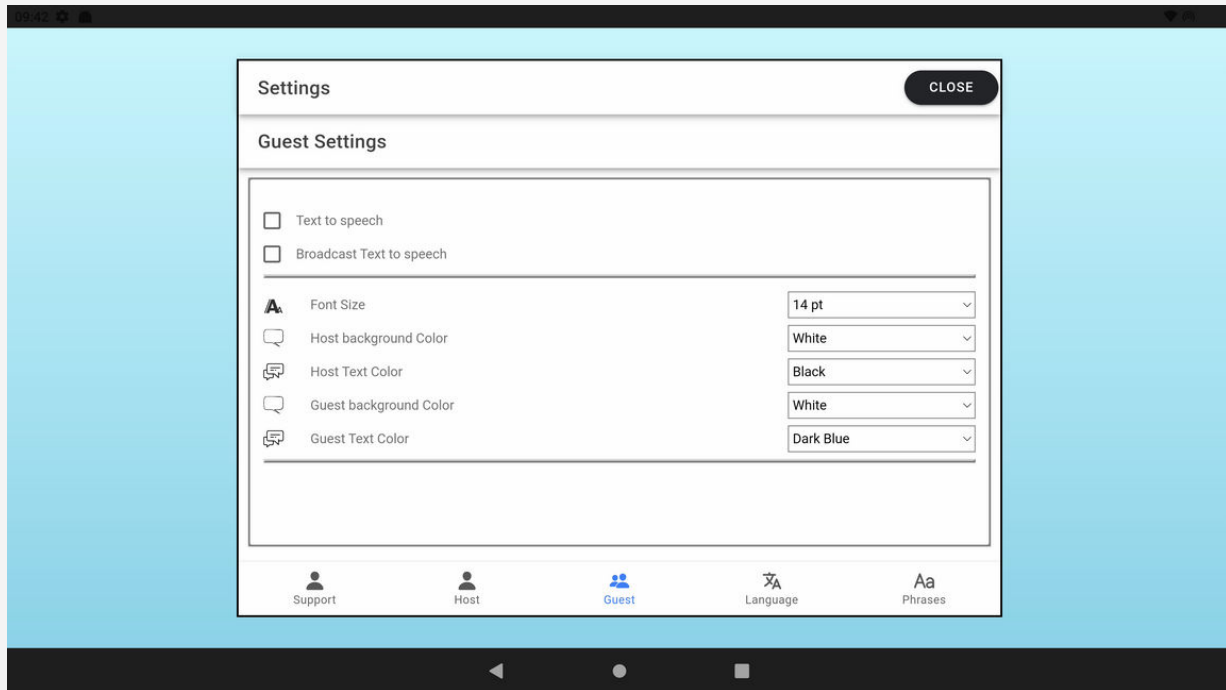

Host Text Color: Change host text color.

Guest Background Color: Change background color for guest speech box.

Guest Text Color: Change text color for guest translation.

Broadcast Room: Your room number

Guest Settings

Text to speech: ILA will translate text and speak out loud in users chosen language.

Font Size: Adjust font size

Host Background Color: Adjust background color.

Host Text Color: Change host text color.

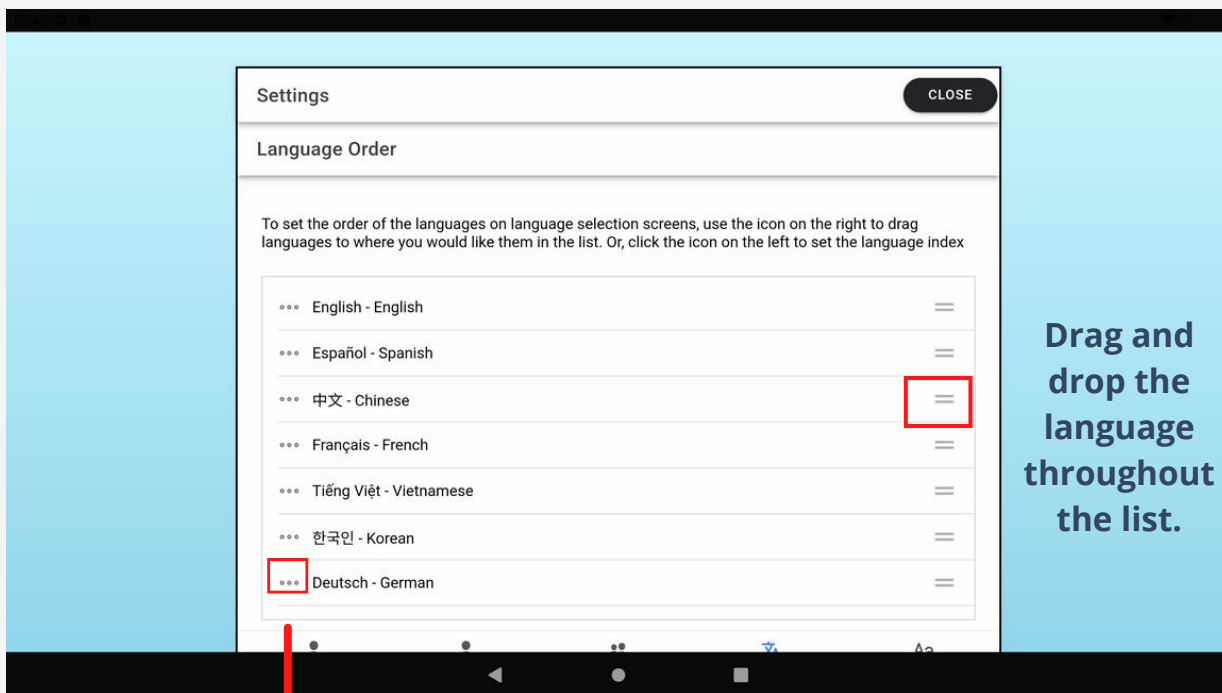

Guest Background Color: Change background color for guest speech box.

Guest Text Color: Change text color for guest translation.

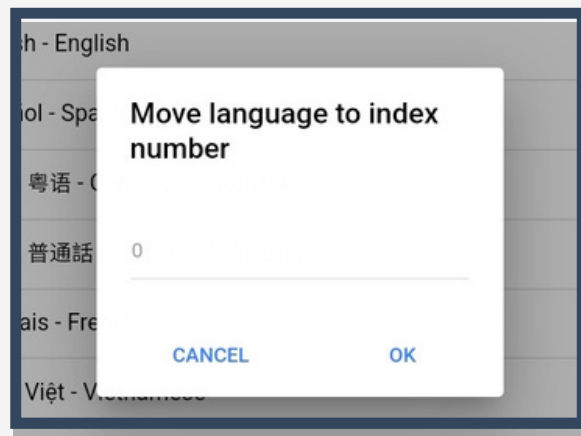

Language Order

Under "Language" tab, set the order of the languages displayed on language selection screen.

Rearrange Language Order

By selecting a language, you can type the position you would like to move it to. ie. Inputting the number 2 will move that language to the 2nd slot.

Mic Options for Board

For ILA to work the SmartBoard must have a mic to be able to listen to the teachers speech.

The mics that have been tested with the NewLine Boards and work are:

Voice Amplify Mic from Newline
(This is our top-recommended mic if it's available to you.)

USB C Mic Supplied by TranslateLive

NewLine Camera
(Note you can only mute/unmute by touching the board)
