Switching Sources

1. Tap the Source icon on the home screen.
2. Any device currently connected to the display will light up in white in the Source window on the home screen.
3. Tap the icon of the source you want to switch to.
4. Plugging your device into the front ports will automatically bring up the device on screen.

Accessing the Built-In OPS Computer

1. Tap the Source icon on the home screen.
2. In the Source window that pops up, tap on the "OPS" button.
3. You will now be viewing and using the built-in OPS Computer.

Bonus Tip:

You can also quickly navigate to the OPS using this icon on the floating menu on both sides of the display:

Switching Sources

Connecting a Computer with USB-C

1. You will need a USB Type-C cable to connect a computer.
2. Plug in one end of the USB-C cable into the front or side USB-C port.
3. Take the other end of the USB-C port and plug it into the USB-C port on your computer.
4. Once both cables have been plugged into the display and the computer, the matching port should turn white on the Source window.

Switching Sources

Connecting a Computer with USB & HDMI

1. You will need an HDMI cable and a USB A to B cable to connect a computer.
2. On the front or side ports of the Q Series, plug in one end of the HDMI cable into one of the HDMI ports.
3. Take the other end of the HDMI port and plug it into the HDMI port on your computer.
4. Plug in the USB-B end of the USB cable into one of the front or side ports labeled "USB Touch."
5. Take the USB-A end of the USB cable and plug it into the USB port on your computer.
6. Once both cables have been plugged into the display and the computer, the matching port should turn white on the Source window.

Installing the Wi-Fi Module

1. Unscrew the 2 screws on the Wi-Fi Module port on the rear of the panel and remove the shielding cover.

2. Insert the Wi-Fi Module into the port until firmly seated, then use the 2 screws to secure it.

Caution

The Wi-Fi Module does not support hot plugging. Therefore, you must insert or remove the Wi-Fi Module when the display is powered off. Otherwise, the displays or Wi-Fi Module may be damaged.
