- (3) USB Touch
- (1) HDMI 3
- (1) HDMI 2 (ARC)
- (1) USB Type-C
- (2) Public USB A

The Home Screen

Google Search Bar

Search the web and the contents of your panel directly from the homescreen!

Android Toolbar

On the bottom of the panel screen is the Android toolbar. Use this toolbar for the following quick access tools:

Back: Goes back one screen or to the previous app. Can also be used to exit an app.

Home: Takes you to the main Home Screen.

Task Switcher: Pulls up all apps currently running on the panel.

Quick Access Toolbar

The Quick Access Toolbar can be accessed by tapping the white circle on either the left or right side of the screen. To minimize the Quick Access Toolbar, tap the white circle again.

OPS/Sources Shortcut

Takes you to the on-board computer (OPS). Tap and hold to pull up additional icons that can take you to the Sources menu, letting you easily switch between available sources.

Home Shortcut

Takes you to the main Home Screen.

Annotation Shortcut

Brings up whiteboarding options on top of whatever is on the current screen. Tap a second time to save a screenshot.

Whiteboard Shortcut

Takes you to the whiteboarding screen, letting you draw and take notes instantly.

Quick Access Menu Button

Tap to open the Quick Access Menu. Tap again to minimize the menu.

Quick Access Bar

Opens up a menu to quickly access Classroom tools, calendar, calculator, clock, and more.

Sound Settings

Opens up a menu where you can adjust the sound settings.

Running Apps Shortcut

Pulls up all apps currently running on the panel.

Back Shortcut

Goes back one screen or to the previous app. Can also be used to exit an app.

Annotation Tools

1. Open your annotation tools by tapping the icon on your side toolbar.
2. Use the tools below to annotate on your content.
3. Tap the icon again to close your annotation tools and take a screenshot of your work!

Moving Apps to Customize Home Screen

1. On the home screen, long press on any app to move its location. The panel will show you where you can place an app by creating a white rectangle in your desired location.

Bonus Tip:

To create a folder of multiple apps, simply move one app on top of another app. A folder will be created automatically. Long press on the folder to rename the folder.

Bonus Tip:

By long pressing, you also have the option to remove the app from the home screen or uninstall the app completely.

Switching Sources

1. Tap the Source icon on the home screen.
2. Any device currently connected to the display will light up in white in the Source window on the home screen.
3. Tap the icon of the source you want to switch to.
4. Plugging your device into the front ports will automatically bring up the device on screen.

Accessing the Built-In OPS Computer

1. Tap the Source icon on the home screen.
2. In the Source window that pops up, tap on the “OPS” button.
3. You will now be viewing and using the built-in OPS Computer.

Bonus Tip: You can also quickly navigate to the OPS using the icon on the floating menu on both sides of the display.

Switching Sources

Connecting a Computer with USB-C

1. You will need a USB Type-C cable to connect a computer.
2. Plug in one end of the USB-C cable into the front or side USB-C port.
3. Take the other end of the USB-C port and plug it into the USB-C port on your computer.
4. Once both cables have been plugged into the display and the computer, the matching port should turn white on the Source window.

Switching Sources

Connecting a Computer with USB & HDMI

1. You will need an HDMI cable and a USB A to B cable to connect a computer.
2. On the front or side ports of the Q Series, plug in one end of the HDMI cable into one of the HDMI ports.
3. Take the other end of the HDMI port and plug it into the HDMI port on your computer.
4. Plug in the USB-B end of the USB cable into one of the front or side ports labeled "USB Touch."
5. Take the USB-A end of the USB cable and plug it into the USB port on your computer.
6. Once both cables have been plugged into the display and the computer, the matching port should turn white on the Source window.

Changing the Settings

1. From the home screen, select the Settings menu item.
2. From the Settings menu, you can adjust things like the Power settings, Internet Network settings, Date & Time, Wallpapers, and more.

Launching Updates

Updates to Firmware and Apps launch automatically “over the air.” A pop-up item will appear on the screen when the update is ready to be downloaded.

Whiteboard Tools

Accessing the Google Play Store

1. On the Home Screen, tap on the “Google Play Store” button.

2. In the Google Play Store, search and select the App you want to download.

3. On the App details screen, tap Install.

4. Once installed, new apps will appear on the second of the home screen. Swipe left to access this page. If you want to move the location of your downloaded apps, see page 5.

Using Newline Cast+

Connecting to Newline Cast+ Using the Windows App

1. Open the Newline Cast+ app on your display.
2. Download the Windows App from <https://newlinecast.app/> on your computer.
3. Open the Cast+ Windows app on your laptop.
4. Type in the Session ID you see on the display.
5. Click the blue arrow or press enter for joining.

Connecting to Newline Cast+ from a Web Browser

1. Open the Newline Cast+ app on your display.
2. Visit <https://web.newlinecast.app/> on your laptop.
3. Type in the Session ID you see on the display and your name.
4. Select "Join" once both Session ID and Name are filled in.
5. When asked, select whether you want to share your entire screen, or just a specific application window.
6. Click "Share."
